

# Transformadores SECOS ENCAPSULADOS

## Características

## Transformadores en ACEITE o SILICONA

### DIMENSIONES Y PESOS APROXIMADOS

| TENSION: 13.200/400-231 V. |               |               |              |              |          |              | TENSION: 33.000/400-231 V. |               |               |              |              |          |              |
|----------------------------|---------------|---------------|--------------|--------------|----------|--------------|----------------------------|---------------|---------------|--------------|--------------|----------|--------------|
| POTENCIA (KVA)             | LARGO (m m) A | ANCHO (m m) B | ALTO (m m) C | TROCHA (m m) | PESO KG. | ACEITE (LT.) | POTENCIA (KVA)             | LARGO (m m) A | ANCHO (m m) B | ALTO (m m) C | TROCHA (m m) | PESO KG. | ACEITE (LT.) |
| 25                         | 850           | 450           | 1000         | 600          | 360      | 125          | 25                         | 1210          | 570           | 1200         | 600          | 500      | 250          |
| 63                         | 1250          | 800           | 1400         | 600          | 600      | 190          | 63                         | 1450          | 800           | 1700         | 600          | 835      | 320          |
| 100                        | 1350          | 800           | 1450         | 600          | 780      | 230          | 100                        | 1550          | 850           | 1700         | 600          | 915      | 360          |
| 125                        | 1400          | 800           | 1500         | 600          | 880      | 280          | 125                        | 1650          | 870           | 1800         | 600          | 1070     | 415          |
